TORTILLA WRAPS

Tortillas

The soft tortilla is a piece of bread for hundreds of dishes. Use it to replace expected food carriers, to go portable, edible, convenient and perhaps eye-catching.

THE FULL TORTILLA RANGE

- 6"** Use the mini tortilla to make the lovely little tacos you find in Californian food trucks or Mexican street kitchens.
- 8"** The 8-incher is perfect for chimichangas or taquitos, which means "small tacos" in Spanish. They are baked or fried taco rolls that can be stuffed with anything you like.
- 10"** This is the way to go when making wraps. The 10-inch tortilla also comes in handy when making snack and starter compatible pinwheels.
- 12"** This grand 12-inch tortillas is a great shortcut to a Turkish lahmacun or a folded pizza slice. It is also the perfect choice for a classic burrito.

FOLD, TURN, FOLD

For soft tortillas that don't crack or stick to each other, make sure to fold the tortillas while still in the package, turn the package 90 degrees, and then fold again.

Our Santa Maria Tortilla range caters for all channels & operator requirements whilst delivering a consistently soft light texture with an irresistible flavour. Baked with love here in the UK we ensure you receive high quality, great tasting authentic Tortillas every time.

Tortilla's versatility is key to its success across daypart and menu offerings. Here are a few of the most common menu uses.

AN ANCIENT IDEA THAT HELPS YOU DEAL WITH TOMORROW'S CHALLENGES

Before humans started to count time, they wrapped food in flatbreads. Today, there are countless versions of this versatile piece of bread. It is spread all over the world and the idea of a portable and edible carrier fit the market better than ever. We have fallen in love with the tortilla - and we have learned how to make it pretty amazing.

USE TORTILLAS TO create all kinds of tacos and wraps, but also as the base for quesadillas, pizzas, pinwheels or deep fried bowls for any dish. Thanks to the versatility, they are great ways to simplify your kitchen operations by keeping a short list of ingredients and doing more with less in order to reduce waste and increase profitability.

WHY CHOOSE SANTA MARIA TORTILLAS

CHIPS & SHELLS

Chips

Nachos and Tortilla Chips are both deep-fried corn chips with a smooth flavour and crunchy texture. They also share the same short list of ingredients: Only corn flour, sunflower oil and salt*. It means these chips does not contain any preservatives. Their scope of use is far wider than you might expect.

*Unless you choose any of the flavoured varieties.

Dip them
Load them
Crush them

Serve as snacks or sides
 Nachos and tortilla chips are great snacks that pairs well with all kinds of toppings and dips. They can also be served as upselling side orders to replace the less convenient fries.

Add crunch to any dish
 The chips are perfect when you want to add a bit of crunchy texture to your burger, pizza, salad or whatever you are creating.

Use as edible forks
 Why don't you skip the regular forks and serve your dish with a handful of tortilla chips instead? More fun, more taste and more crunch!

Kind of the same, but different

What makes nachos something other than tortilla chips

The most obvious difference of nachos and tortilla chips is the shape. Thanks to its triangular cut, the tortilla chip is a great tool when digging into smooth sauces, chunky salsas and spicy stews. The circular nacho chips are a bit thicker, which makes them perfect to load with cheese, sour cream, jalapeños and other comforting ingredients. Use them for generous plates and baked dishes.

Flavours are incredible.

They turn a bite into a moment worth sharing.

They turn a sip into an experience worth repeating.

We spend our time finding them, boosting them, pairing them.

We do it with pleasure and respect for the planet we all share.

That is what unites us as people.

That is what unites us as a food and beverage company.

And we think that is what unites us with you.

FLAVOURS FOR PROFESSIONALS.
